## COMMANDER'S ATTENTION

This Commander's Manual is designed to provide assistance to the Special Forces unit commander in planning, preparing, conducting, and evaluating unit training. It will be made available to all officers and enlisted personnel who supervise soldiers of MOS 11B-S.

The Special Forces soldier is a unique individual who has demonstrated above average aptitude, ability in basic military skills, physical condition, and motivation. The challenge of all Special Forces unit leaders is to insure that training is dynamic, innovative, well planned, and adequately supervised. The unit leaders must also keep in mind the fact that the Special Forces soldier has a dual requirement: (1) To maintain and demonstrate the ability to perform those critical tasks required of his basic 11B MOS; (2) To maintain and demonstrate the ability to perform those tasks which are unique to Special Forces operations.

This Commander's Manual lists those tasks which are unique to Special Forces, as well as the sources and location of training support material. The Commander's Manual which identifies critical tasks for the 11B infantrymen is FM 7-11B/C/CM, published by the US Army Infantry School, Fort Benning, Georgia.

This manual was prepared by the US Army Institute for Military Assistance.

JACK V. MACKMULL  
Major General, USA  
Commandant

RESERVE COMPONENT COMMANDER

ARMY NATIONAL GUARD - ARMY RESERVE

The information on this page is for the commanders of Army National Guard/US Army Reserve Special Forces units. Although this manual contains critical tasks to be performed by the Active Army soldier on equipment available in the Active Army inventory, most tasks may require modification because of differences in equipment on hand, training facilities, and training time available to Reserve Component units.

Many tasks included in this manual were taught in the formal Special Forces Qualification Course which some of your personnel attended. Other tasks must be taught at unit level. As is the case for Active Army Special Forces personnel, Reserve/National Guard Special Forces personnel will be required to maintain and demonstrate proficiency in those critical skills appropriate to individual's basic MOS and also those critical skills pertaining to Special Forces operations which are included in this manual.

## CHAPTER 1

## INTRODUCTION

As a Special Forces unit commander, you are responsible for insuring that your soldiers, whose primary MOS is 11B, are properly trained in those tasks which are unique to Special Forces operations and those tasks which are basic for 11B infantrymen. This Commander's Manual identifies those tasks which are unique to individuals who occupy 11B-S duty positions in Special Forces units. It should be used in conjunction with FM 7-11B/C/CM, the Commander's Manual for infantrymen. You should have FM 7-11B/C/CM on hand in your unit because it is the basic guide for commanders and enlisted personnel who must train and supervise personnel whose primary MOS is 11B. FM 7-11B/C/CM provides a very comprehensive explanation of the subjects listed below.

- a. The Enlisted Personnel Management System.
- b. EPMS and the Commander.
- c. The Infantryman's Career Progression Pattern Under EPMS.
- d. The Skill Qualification Test (SQT) for Infantrymen to Include the SQT Scoring System.
- e. Training Under EPMS.
- f. The Training Cycle for MOS 11B.
- g. A List of Common Entry Training Requirements Which All Infantry Soldiers Must Complete.
- h. Noncommissioned Officer Education System (NCOES).
- i. The Unit Training Program for Infantry Units To Include the Amount of Involvement by Noncommissioned Officers.
- j. Training Support Available To Enhance the Training of Infantry Soldiers.

If FM 7-11B/C/CM is not on hand in your unit, you should request sufficient quantities directly from the United States Army Publication Center, 2800 Eastern Boulevard, Baltimore, Maryland 21220.

## YOUR UNIT TRAINING PROGRAM

In addition to those recommendations in FM 7-11B/C/CM in regard to the unit commander's responsibility to training, the following considerations may be used as a guide.

Evaluate the level of proficiency of each individual and the unit against the standards you feel are necessary. If standards are not adequate, structure each part of your training program to "bridge the gap" or raise the existing proficiency level to meet your desired standards.

Determine where your unit should be with its training program, prioritize your training goals, and accomplish first those goals which are of utmost importance in terms of mission accomplishment.

Determine what training resources the unit has and the availability of these resources so that you may attain your training goals. Some of your training resources include personnel, time available for training, training facilities, and support material.

As a final note, do not forget the important role your noncommissioned officers must play in developing, executing, and evaluating your unit training program.

## TRAINING ASSISTANCE

Assistance may be obtained from a variety of published sources. As a starting point, some very useful publications for the training management are as follows:

- FM 21-5      Military Training Management. Provides information concerning the development and scheduling of a training program.
- FM 21-6      How to Prepare and Conduct Military Training. Provides step-by-step guidance on the preparation and evaluation of a training session.

## CRITICAL TASK LIST

The Critical Task List contained in chapter 2 of this Commander's Manual provides you with a listing of the critical tasks for a Special Forces soldier whose primary duty position is 11B-S and is organized as follows:

Section I - Common Tasks.

Section II - The Operations Sergeant/Assistant Operations Sergeant.

Section III - The Light Weapons Leader.

Each Critical Task List may be divided into the components explained below:

Task Numbering - A 10-digit number is associated with each task. The first three digits identify the TRADOC service school that developed the task. For the US Army Institute for Military Assistance, this number is 331. The second three digits identify the functional area in which the task was written. The last four digits represent the task number.

Task Description - The task description describes the action the soldier must be trained to perform. The tasks identified in this manual are exactly the same as those identified in the Soldier's Manual.

Primary Training Description - The references and training material listed for each task are those which are available at the time the Soldier's Manual and the Commander's Manual were developed and should be used in training your soldiers. The references cited in this manual are exactly the same as those listed at the end of each critical task under "References" in the Soldier's Manual.

Initial Training Level - The skill level at which the soldier receives initial training in the particular task is indicated by the number in this column. Briefly, the five skill levels which correspond to the levels of individual training are:

- Skill Level 1: Entry level training (E1-E4).
- Skill Level 2: Primary level training (E5).
- Skill Level 3: Basic level training (E6).
- Skill Level 4: Advanced level training (E7).
- Skill Level 5: Senior level training (E8-E9).

Responsibility for Training - Information in this column indicates where training occurs as noted by the "Q" or "A." The letter "Q" indicates qualification training, normally introductory training given an untrained soldier which results in the soldier performing a specified task within Soldier's Manual standards. The

letter "A" indicates additional training, refresher, or advanced training given to a previously trained soldier that results in the soldier regaining or improving Soldier's Manual task standard proficiency. Both qualification and additional training are intended to train the soldier to master critical tasks. A soldier masters a task when he can perform it under the conditions and to the standards prescribed in the Soldier's Manual. In his qualification training, the soldier receives critical task training at the location or school listed at the top of column. He is trained to perform the task under specified conditions to prescribed standards. Either qualification or additional training in critical tasks may be conducted at an established service school.

## REFERENCES

The primary training materials required for each critical task are shown in the column headed "Primary Training Materials" in chapter 2, Consolidated Critical Task Listings. This column will contain only the reference number or short title of each reference. If you cannot identify the reference by the number or short title indicated, refer to the consolidated list of training references in appendix A of this Commander's Manual. Appendix A provides information on Department of Defense (DOD) directives, Department of the Army (DA) publications (Army regulations, training circulars, DA pamphlets, technical manuals, field manuals), training extension courses (TEC) lessons, graphic training aids (GTA), medical publications, special texts/handbooks and subcourses. To insure that you have the most recent DA publications on hand, you should check the DA Pamphlet 310 series. Those publications not on hand can be requisitioned directly from:

The United States Army Publication Center  
2800 Eastern Boulevard  
Baltimore, Maryland 21220.

Other training materials you may obtain are:

Training extension courses (TEC) lessons from your organization's learning center or from the Training and Audiovisual Support Center (TASC) at your supporting military installation.

Army correspondence courses by writing to:

Army Correspondence Course Program (ACCP)  
US Army Training Support Center  
Newport News, Virginia 23628.

CONSOLIDATED LIST OF TRAINING AMMUNITION, PYROTECHNICS,  
AND EXPLOSIVES

A consolidated list of live, inert, or simulated training ammunition is contained in appendix B of this manual. The number of rounds shown in the column headed "Per Iteration" can be adjusted to comply with the training needs and readiness conditions of your unit.

CONSOLIDATED LIST OF TRAINING AIDS AND DEVICES

A consolidated list of training aids and devices is at appendix C. This list is intended to provide the commander with information concerning the major items of equipment required to conduct the training listed in this Commander's Manual.
